

FUND AIMS

The objective is to provide above average total returns over the long term by investing primarily in global equities. The Fund may also invest in other transferable securities, money market instruments, cash and near cash. Up to (but no more than) 10% in value of the Fund may be invested in each of the following: collective investment schemes and deposits.

INVESTMENT REPORT

- The MSCI All Countries World Index rose in July by 3.3%.
- We have sold out of a number of holdings recently, including Schlumberger (oil services company) and SAP (software company).
- The common theme for both is that they had been involved in deals and we had concerns about their acquisitive behaviour.
